a thin chenille yarn of Chinese
production and a 2.5 mm hook
*height 26 cm/10.2"

*

*Please, pay attention to the fact that every person has his/her own style and crochet density. The size of the finished toy may vary from the size indicated in the pattern.

Materials & Supplies:

- ✓ plush yarn (120 m/100 gr.) (131 yds/3,5 oz) (Himalaya Dolphin Baby, YarnArt Dolce, etc.)
(main shade consumption 2-2.5 skeins, other shades – less than a half of a skein):
 - palette for the body (page 6);
- ✓ cotton/semi-cotton yarn (~330 m/100 g) (361 yds./3.53 Oz.) (YarnArt Jeans, Alize Cotton Gold, Gazzal Jeans, etc.):
 - black (for pupils and nose);
 - to match plush yarn shades to sew the details (optional);
- ✓ 3.5 mm hook;
- ✓ long needle for tightening (for plush yarn ~ 12 cm);
- ✓ nylon thread for tightening or any strong light thread;
- ✓ needles for sewing body parts;
- ✓ stitch markers;
- ✓ pins with large head;
- ✓ scissors;
- ✓ fiber filling;
- ✓ love. 

*depending on your crocheting density, thread tension, crocheting method ([tick / mixed / cross](#) ← watch the video), you should correctly choose the hook size. I crochet in a mixed way (capture on top, then capture on bottom), strong thread gauge/tension.

*when creating a toy using plush yarn, I sew almost all the details with a semi-cotton thread to match. So, it turns out neater and stronger.

Abbreviations:

*U.S. terminology

MR – magic ring;

FLO – front loops only;

(SC, INC)*6 (18) – repeat the combination in brackets 6 times, the number in brackets is the total number of St in a round.

About shifting of the beginning of the round:

In this crochet pattern we will shift the stitch marker so that my pattern coincides with yours. Next, I explain why the beginning of the round may shift in different ways or not shift at all.

The beginning of the round shifts to the right (for a right-handed person) as you crochet, or doesn't shift at all, which depends on your crocheting technique (the method and strength of the thread tension, the position of the thread relative to the canvas) (see photo below);

the beginning
of the Rd
DOES NOT shift

the beginning of the
Rd shifts to the **RIGHT**

align the beginning of the Rd:
work additional shifting stitches, which
we **DO NOT** take into account in the
total number of stitches in the Rd, and
shift the stitch marker to the **LEFT**

First, we are going to crochet arms and tail, as they are going to be attached in the process of crocheting. But you can always sew them to the body in specified rounds.

Arms:

- *make 2 details
- *stuff only the palms

Thumb:

- *white yarn
- *don't stuff

1. 6 SC in MR;
- 2-5. 4 rounds of 6 SC;
- work a CH, fold in half and crochet the sides together with 3 SC;

All other fingers (except the thumb):

- *white yarn
- *make 4 details
- *don't stuff

1. 6 SC in MR;

8-12. 5 rounds of 24 SC;

- in Rd 13 we attach the thumb;
- to make sure that the finger is exactly in its place, fold the detail in half along all the fingers and shift the stitch marker to the next SC from the fold line (see page 9);

Muzzle:

- sew with a needle or work a seam of 3 SS in the area of the top of the detail;

- turn it out on the front side.

Guideline for choosing yarn for pupils and nose:

*for a semi-cotton toy: use the same thread as for the body divided in half;

*for a toy made of thin plush /velour /chenille: use a semi-cotton thread as
YarnArt JEANS/Alize Cotton Gold (174 yds./1.76 Oz.);

*in all cases, we use the same hook as for the body (it is allowed to use a smaller hook if there are gaps or the pupil comes out too large).

Nose:

*black semi-cotton yarn

*don't stuff

1. 6 SC in MR;

2-3. 2 rounds of 6 SC;

- tighten the hole, leave a long end to sew;

- sew the nose on the muzzle two rows below the seam line (see photo);

How do I usually tighten the hole and hide the thread end inside.

- then lift the nose up and fix it with a stitch one row higher.

 - fasten off;
 - hide the thread inside the detail (if you crochet with a semi-cotton yarn, then leave a long thread for sewing).

Head design:

Now begins the most painstaking part of the work. It is important to place all the details correctly on the head. Fix each detail well before sewing so that it does not shift when sewing. Check the placement of the details according to the photo and indicated rounds in the description.

- first, place the eyes and muzzle correctly on the head (try on);
- we count from the first Rd of the head - Rd 49;
- the eyes are attached in the area of Rds 7-15 of the head (go down the Rd under the muzzle);

- the muzzle is attached in the area of Rds 1-7;
- the side edges of the muzzle are raised up;
- in the eye area, move the muzzle a row lower, forming grooves under the eyes;
- when fitting, stuff a bit the muzzle, but DO NOT stuff the bottom part;

- if needed, adjust the place of the details yourself;

- remove the muzzle and sew the eyes along the contour with a thin cotton thread to match;

- sew on the muzzle, stuffing it slightly in the process (do not stuff the bottom part);

Muzzle tightening:

- mark 4 points of tightening: 2 points on the sides of the muzzle at a distance of 1 SC between them;

- use a nylon thread or a strong cotton thread for tightening;
- insert the needle from above and withdraw it at the lateral extreme point;
- withdraw the needle with the thread through the adjacent point back into the open hole;
- stretch the ends of the threads, tie them into a knot;
- perform the same steps from the opposite side;

- embroider the outline of a smile with a black thread through the open hole in the head;
- the black thread lies on the same Rd with the tightening line, it does not go down;
- the arc is formed with the help of tightening points that lift the smile line up;

- hide all the ends of the threads into the open hole of the head;
- if needed, stuff additionally the top of the head and tighten the hole, hide the thread inside;

- place the ears on the sides of the head in the area of Rds 17-22 of the head;
- sew with cotton thread to match;

- sew front side prickles on the sides;

- fix them with a stitch from the inside near the muzzle so that they do not stick out to the sides;

- sew the lower central prickle between Rds 16 and 17;

- also fix it with a stitch in the middle to the head;

- sew the back side prickles two or three rows above the central one;
- also fix them with stitches from the inside in the middle (the places are indicated with pins in the photo);

- sew the upper central prickle and fix it in the middle to the head;

- sew the rim on the sides;

- sew the bangs, folding the curls in half at the base fixing above each other.
