Extra (shift) stitch

A very common term in crocheting is the extra stitch. So what is this loop?

When crocheting, almost always the marker of the beginning of the round is shifted to the right side. It is necessary to align it. And how to do it?

You just need to crochet another 1sc at the end of the round and shift the marker by one stitch.

The second stitch becomes the first and the first becomes the last. This is the shift (extra) stitch.

And the most important thing! This stitch is not included in crocheting.

Abbreviations:

- MR - magic ring
- sc - single crochet
- inc - increase (2 sc in one stitch)
- dec - decrease (2 sc together)
- hdc - half double crochet
- hdcinc - half double crochet increase (2 hdc in one stitch)
- dc - double crochet
- ch - chain
- t-ch - turning chain (when work in rows)
- sl st - slip stitch
- BLO - back loops only
- Bobble st - crochet unfinished dc stitches in one stitch with a common top
- (...) - number in brackets means a number of stitches in a round
- (...)*N- repeat instruction in brackets N times

PS. If desired, eyes, pupils and glare can be cut out of felt and glued together.
